## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Arz et al. P.N. 6,515,479 (Arz).

Arz discloses a switchable gradient coil for a MRI apparatus. The coil as described in connection with Fig. 2 features a number of independently drivable coil elements. The coil elements can be driven individually or in winding packets. The coil system has selectable performance features among which are the linearity volume or FOV. One of the modes of operation of the coil system (see e.g. claim 2) involves reversing the current flow in a set of windings. This mode of operation corresponds one of the modes as claimed where in one mode the fields add and in the other the fields subtract

producing two corresponding fields of view. Arz. Meets all the limitations of the claims at issue.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mckinnon and Vavrek et al. disclose adaptable gradient coil configurations. Note specifically the "Background of the Invention" in Mckinnon col. 2 lines 51-55 that describes the contents of P.N. 5,311,135 to Vavrek et al.
